

#### **IV. REMARKS**

Applicant believes that the foregoing amendments are in condition for entry, as they do not add any new matter, but instead correct certain typographical errors appearing in the claims, provide consistency between the specification, Abstract, and the claims, cure certain dependency defects in the claims, propose substituted drawings better suited for publication, and propose minor substantive amendments to certain dependent claims.

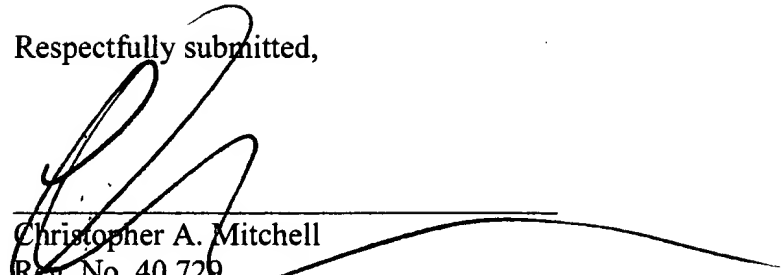

More particularly, Applicant proposes to amend claims 4 and 5 to remove therefrom the recitation of specific aryl groups comprising pyridine and phenyl groups, as well as the specific alkyl group methyl. The prior recitation of these specific groups was redundant of the generic recitation of aryl and alkyl groups as substituents. Applicant proposes instead to recite these specific substituents in new claims 26 and 27 which depend, respectively, from dependent claims 4 and 5. Applicant further proposes to change the dependency of claims 23 and 24, particularly to remove any previous problems with a lack of antecedent basis in respect of claim 24.

Further to M.P.E.P. Section 714.16, Applicant submits that the foregoing claim amendments are necessary to adequately claim the scope of Applicant's invention, require no new search since the amended claims, and more particularly claims 4 and 5, continue to recite the same generic substituents which were presumably already subject to a search comprehensive of the relevant subject matter, and are, furthermore, allowable over the art of record at least because the claimed subject matter comprises limitations dependent upon already allowed claims.

In view of the foregoing, Applicant earnestly and respectfully solicits entry of the amendments proposed by this paper. Of course, the examiner is invited to contact Applicant's

undersigned counsel at (734) 662-0270 if she should have any questions or comments concerning this amendment.

Respectfully submitted,

---

## **II. IN THE DRAWINGS**

Applicant submits herewith replacement drawings in substitution of the drawings submitted by earlier amendment. The included drawings are better suited to publication, and introduce no new matter.
